

Download File PDF Do Want Engineer Essay

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Why I Want To Be An Engineer

Generally, I want to be an engineer because I kind of like designing stuff and automobiles. I have interest over technical stuff or those things that involves hands on. I have learnt too much theory and I can say although that I don't like to read theory or thick books, but in the end it is the requirement in order to become an engineer.

I want to be a mechanical engineer because as a mechanical engineer I am certified to do things that only mechanical engineers are able to do. The engineer of mechanical engineering are to perform engineering duties in planning and designing tools, engines, machines, and other mechanically functioning equipment. I oversee installation, operation, maintenance, and repair of equipment such as centralized heat, gas, water, and steam systems; to weigh different design choices on certain merits and choose the solution that best matches the requirements; accomplish crucial and unique task that is to identify, understand, and interpret the constraints on a design in order to produce a successful result; determine the causes of a process failure; and test output to maintain quality; and defining problems, conducting and narrowing research, analyzing criteria, finding and analyzing solutions, and making decisions.

Other than that, I want to be a mechanical engineer because it is well known that mechanical engineers have the highest employment in the industry and the wages are quite high.

Industries with the highest levels of employment in this occupation include: Architectural, Engineering, and Related Services; Aerospace Product and Parts Manufacturing; Navigational, Measuring, Electromedical, and Control Instruments Manufacturing; Scientific Research and Development Services; Engine, Turbine, and Power Transmission Equipment Manufacturing; Oil and Gas Extraction; Industrial Machinery Manufacturing; and Motor Vehicle Manufacturing.
