

Download File PDF Exaggerated Traits And Breeding Success Answers Book

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

5. Two traits in Purdue maize breeding program are considered: (1) drought tolerance (2) carotenoid content. During field-based experiments, we estimate genetic and environmental variance components for these two traits. For drought tolerance, the estimates were $V_G = 65$ and $V_E = 35$. For carotenoid content the estimates were $V_G = 92$ and $V_E = 8$. The broad-sense heritability (H^2) is _____ for drought tolerance and _____ for carotenoid content.

- a) 0.35, 0.08
- b) 2.16, 1.09
- c) 0.65, 0.92
- d) Cannot be determined from the information provided.
