INTRODUCTION

Please note to purchasing the Infinity® MSX In-car Management System. So that we may better serve you should your new product require service, please retain your original purchase receipt and read the enclosed warranty registration card.

BOX CONTENTS

Your MSX box should contain all the items shown in Figure 1:

WARNING!

Playing loud music in an automobile can hinder your ability to hear traffic and potentially damage your hearing. We recommend listening at low or moderate levels while driving your car. Infinity accepts no responsibility for hearing loss, bodily injury, or property damage resulting from the use or misuse of this product.

INSTALLATION

IMPORTANT

To get the most out of your MSX features, we strongly recommend that installation be entrusted to a qualified professional. Although these instructions explain how to install, connect and wire the MSX, they cannot show all of the different possible systems that can be assembled using the MSX. Please ask your authorized Infinity car audio dealer about professional installation.

INSTALLATION WARNINGS AND TIPS

- Always use protective eyewear when using tools.
- Turn OFF the vehicle's audio system and other electrical devices before beginning installation. Disconnect the 12-voltign lead from the vehicle's battery.
- Check clearances on both sides of any planned mounting surface before drilling any holes or installing any screws. Remember that the screws can extend behind the mounting surface.
- At the installation location, locate and make a note of all fuel lines, hydraulic brake lines, vacuum lines and electrical wiring. Use extreme caution when cutting or drilling in and around these areas.
- Before drilling or cutting holes, use a utility knife to remove unwanted fabric or vinyl to keep material from snagging in the drill bit.
- To minimize noise, when routing cables, keep top-of-cable away from power cables and speaker wires.
- When making connections, make certain they are secure and properly insulated.
- If the MSX has to be replaced, use only the same type and rating as the original. Do not substitute another kind.

INSTALLING THE CONTROL HEAD

We recommend finding a location for the Control Head first, and then finding a location for the Junction Box that is within the length of the Control Head's integral 6m cable.

IMPORTANT INSTALLATION WARNINGS

- Do not install the Control Head where it may obstruct your view through the windshield, or of your vehicle's indicator displays.
- Do not install the Control Head where it may hinder the function of safety devices such as an airbag. Doing so may prevent the airbag from functioning properly in the event of an accident.
- Mount the Control Head in a location that is easily accessible.
