

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Chapter 14 The Human Genome
Section 14-1 Human Heredity (pages 343-348)

This section explains what scientists know about human chromosomes, as well as the inheritance of certain human traits and disorders. It also describes how scientists study the inheritance of human traits.

Human Chromosomes (pages 343-348)

1. How do biologists make a karyotype?

2. Circle the letter of each sentence that is true about human chromosomes.
 - a. The X and Y chromosomes are known as sex chromosomes because they determine an individual's sex.
 - b. Males have two X chromosomes.
 - c. Autosomes are all the chromosomes, except the sex chromosomes.
 - d. Biologists would write 46,XY to indicate a human female.
3. Complete the Punnett square below to show how the sex chromosomes segregate during meiosis.

4. Why is there the chance that half of the zygotes will be 46,XX and half will be 46,XY?
